

Fiber Sound Detector

Product Description

For sound detection by fiber, no electric spark, no influence from strong magnetics and high electric power.

Technical Parameters

- Sensitivity: 60mV-200mV/Pa
- Frequency response: 20-6000Hz
- Working frequency: 20-20000Hz
- Transmission distance: 1-100m
- Operating voltage: 12V

Applications

- High voltage electrical equipment detection
- Oil and gas pipeline leakage detection
- Flammable and combustible area detection
- EMI and RFI area detection
